

Virtual and Face to Face (Hybrid) Course Postmastectomy Breast Reconstruction

22st November, 2024 (Zoom meeting)

25-26th November, 2024 (European Oncological Institute (IEO))

Introduction

This course has been designed for reconstructive surgeons, with five or more years of experience, who wish to advance their confidence performing advanced breast reconstruction procedures, mainly focusing on implant-based breast reconstruction.

The interactive training program consists of a mix of interactive lectures and case discussions as well as live surgery observation in the OR, designed to share the best clinical practice and surgical tips & tricks from one of the most renowned centers in reconstructive breast surgery.

On behalf of Mentor and faculty, I wish you a very instructive course.

Yours sincerely,

Maja Pavlek

Mentor Education Lead

Johnson & Johnson Institute
