## LEARNING OBJECTIVES

- To better understand screening and prevention of breast cancer in high risk population
- To learn about genetic testing and management of patients germinal BRCA carriers
- To understand the biology of breast cancer and its implications in the management of this disease, with focus on risk stratification according to clinical and genomic features
- To learn about the multidisciplinary management of early, locally advanced and metastatic breast cancer in surgery, radiation therapy and systemic therapy
- To simulate multidisciplinary breast cancer care through patient cases discussion
